NAR Targets

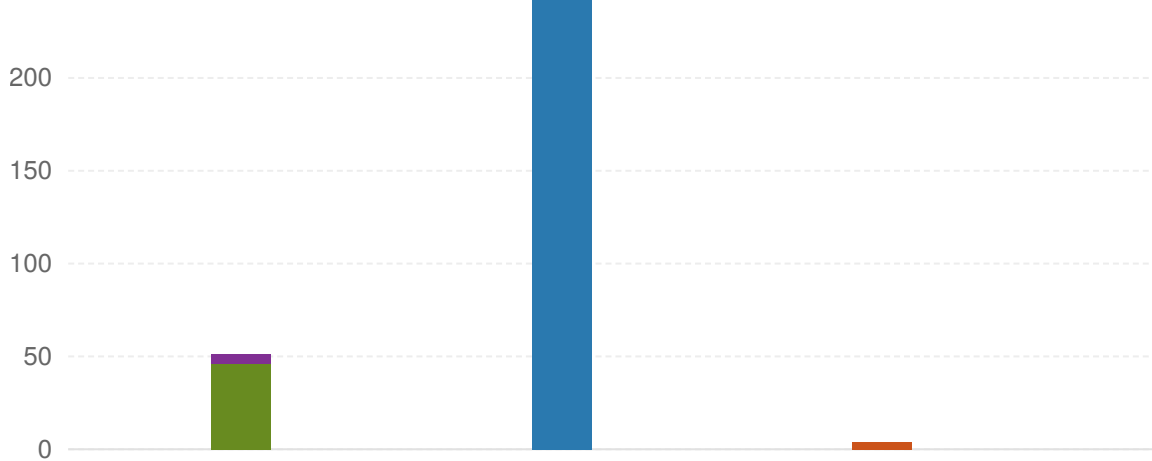

[Share](#)

The visualizations below shows the total casualties, the sum of victims killed or wounded, by Armed Revolutionary Nuclei for each year. The number of casualties per target is indicative of the success of attacks against this target. This may contrast with the number of attacks per target, seen below, which tends to be more indicative of this groups intent to attack a certain target. Changes in attack targets over time may indicate a shift in organization priorities, as attacks against certain groups like the military and police may be driven by different motives than attacks against other targets.
